

Ma and Pa Kettle Do Math

 vidqt.com /id/P4TyVyvyHWU

I figure 75% to you and 25% divided between the 5 of us, that makes 5% for each one of us.

Aa ah ah, Billy you're cheating yourself. If there's 25% divided among the 5 of you. That's 14% a piece.

Oh no, listen Pop. I wouldn't cheat you, you know I wouldn't. Now look here.

Now 25 divided by 5 is 5. You see. 5 won't go into 2, will it? But, 5 goes into 25, 5 times.

You're wrong Billy. Now, I'm a pretty good mathematician. Now, 5 into 25. 5 won't go into 2, will it? But 5 goes into 5 once. Now, we didn't use the 2 before so we'll bring that down. Now, 5 goes into 20 goes 4 times. There you go 5 goes into 25, 14

No, look Bob, Now let me prove it too. 5 times 5 is 25.

I'm surprised at your learning. What? I'M SURPRISED AT YOUR LEARNING!

Now I'll show you. 5 times 14 is 25. 5 times 4 is 20. 5 times 1 is 5. 25 that's it.

No, no. Your wrong. I'll prove it to you. I'll put down five 14's here. I'll prove to you by addition that 5 14's is not 25.

4.. 8.. 12.. 16.. 20..

21 22 23 24 25

There you go. You better brush up. I don't want to see you boys cheated.
